KEYSHOCK is an invaluable, easy-to-use system that protects your equipment from abusive operators. The system activates when an impact exceeds a predetermined level, alerting management to abusive impacts and improper handling. Comprehensive software puts you in control by allowing management to set sensitivity parameters, program alarm preferences.

Features

- Alerts to vehicle impacts and abusive handling
- Absence of battery power does not reset alarm (only management can reset after alarm is initiated)
- Easy-to-install on any make or model vehicle
- Highly customizable alarms
- Must be re-initialized after impact by management

Problems Solved

Vehicle Damage: Alerts management to vehicle abuse

Operator Accountability: Provides management with operating reporting

Impact Accuracy: Impact levels can be predefined

Lift Truck Safety Management with Comprehensive product line for numerous applications.

I.D. Systems: Creating a Culture of Safety
KEYSHOCK:
Simple impact alerting solution
Easy to install and use
Works on nearly every machine type

Specifications/Certifications
Programmed via USB connection on laptop (FREE software)
Password protected log in for settings.
Enable/disable any of X-Y-Z axis.
Set sensitivity for each axis independently.
Set “ignore” time for each axis (ms).
Set style for each output independently.
View current output of each axis (helpful in setting accurate threshold).
