

OC59

Comprehensive Monitoring

Quickly and accurately monitor utilization, damage, and safety compliance to find problem areas and identify potential solutions.

The PowerFleet Expert OC59 is a cellular based solution that ensures site managers in warehouses, manufacturing, distribution, retail and construction/outdoor environments can have peace of mind knowing that only certified operators are using the equipment. PowerFleet OC59 ensures that the

operator has completed safety inspections required by OSHA, meets HSE regulation compliance, and is being operated safely. The OC59 is designed for simplicity, from simple installation to intuitive use and management. It delivers powerful results without consuming your time.

FEATURES

EASILY INSTALLS ON
ANY VEHICLE

LTE CELLULAR
AUTO DATA COLLECTION

- Comprehensive data collection via cellular for in-depth analysis through PowerFleet's cloud-based software application
- Relays control vehicle ignition and starter for authorized operators

PROBLEMS SOLVED

HSE COMPLIANCE

Automated safety checklists

EQUIPMENT & FACILITY DAMAGE

Impact sensing

UNAUTHORIZED OPERATORS

RFID card or numeric code is required for access, know who is driving what, when and where

NO IT DEPARTMENT

No IT department needed and no Wi-Fi security concerns

NOT LIMITED TO INDOOR OPERATIONS

Cellular communications provides greater flexibility in operating environments

FLEET UTILIZATION

Right size your fleet and improve utilization

MAINTENANCE COSTS AND SCHEDULING

Idle timeout by vehicle type reduces internal combustion truck planned maintenance /fuel use, emissions

LOCATION

GPS reporting for location and rental billing reconciliation

Powerful Insights

PowerFleet Expert OC59 provides intelligent fleet management solutions that deliver complete regulatory compliance, automated safety and security, and a low total cost of ownership for mobile equipment. The OC59 delivers total visibility and management, with control and views that can be tailored to sites or departments, even in harsh outdoor environments.

POWERFLEET INFOMATICS FEATURES
