

LV-100

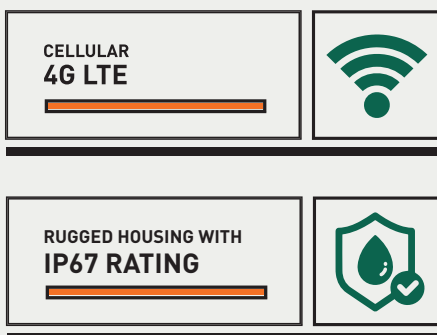

Critical Visibility

The new standard for asset tracking.

Transportation logistics is all about flexibility and scalability. Powerfleet has raised the bar for asset visibility. The LV-100 is an all-purpose tracking solution built for the logistics operation that demands optimal efficiency, ultra-low maintenance, and long battery life.

Gain insight into your fleet and freight to improve utilization, optimize fleet size, and drive customer satisfaction. Powerfleet delivers the intelligence you need to make better decisions and stay connected to your assets and freight.

FEATURES

- Requires no external power
- Ultra-low maintenance with 8-year battery life*
- Fast deployment with quick install
- Tamper detection and alerts
- LED indicator lights for install verification
- Industry Leading Drive Start/End Detection and Reporting

** Based on 1 report per day*

PROBLEMS SOLVED

VISIBILITY

See asset status and location in real-time

UTILIZATION

Identify underutilized assets and reduce dormancy

CAPACITY

Discover inefficiencies with loading and unloading of freight

VELOCITY

Improve productivity with faster turns

TIME

Reduce dormancy by seeing which assets are idle and where

LABOR

Reduce costs associated with manual yard checks

INFORMATION

Make better decisions with actionable data

Intelligent Logistics

The LV-100 delivers critical asset visibility to reduce transit cycle times and improve fleet utilization. The LV-100 requires no connection to external power and is designed to provide extended years of maintenance-free performance. The ruggedized, low-profile enclosure can be installed in less than 10 minutes with no special tools or equipment. Optional wireless sensors are available for asset status and condition.

ASSETS SUPPORTED

Dry Vans, Containers, Chassis,
Heavy Equipment, Flatbeds,
Reefers, Tankers, Rental Assets
