POWER⊗FLEET ®

LV-300
Constant Visibility

Today's supply chain demands speed and intelligence.

The LV-300 asset tracking solution provides continuous real-time visibility while in transit, and more accurate arrival and departure information to better plan supply chain resource allocation. The LV-300 delivers high-frequency reporting on the status and location of assets.

The LV-300 supports persistent external power source for frequent reporting while tethered as well as a long-lasting rechargeable battery ideal for movements within yards

and terminals. It was designed with high-security in mind with built-in tamper detection. Optional wireless sensors are available for additional asset status and condition reporting.

Gain actionable intelligence to improve utilization, optimize fleet size, and drive customer satisfaction. Powerfleet delivers the insights you need to make better decisions and stay connected to your assets and freight.

FEATURES

RUGGED CONSTRUCTION FOR
HARSH AREAS

CHASSIS MONITORING
CONTAINER ON/OFF

- Tethered power source with up to 20-month rechargeable battery*
- ABS/ECU connector for faster installation and no cable splicing
- Wireless sensor integration
- Tamper detection and alerts
- LED indicator lights for install verification
- Industry Leading Drive Start/End Detection and Reporting
- Odometer data

* Based on one report per day

VISIBILITY
Continuous updates of status and condition

CAPACITY
Discover inefficiencies with loading and unloading of freight

UTILIZATION
Identify underutilized assets and reduce dormancy

VELOCITY
Improve productivity with faster turns

TIME
Reduce dormancy by seeing which assets are idle and where

INFORMATION
Make informed decisions

Intelligent Logistics

The LV-300 delivers continuous asset and freight visibility. In addition, you get the best of both worlds—persistent external power for continuous reporting and visibility while tethered and a long lasting untethered battery ideal for movements within yards and terminals. Designed with high-security in mind with built-in tamper detection. Optional wireless sensors are available for asset status and condition.

ASSETS SUPPORTED

Dry Vans, Chassis, Flatbeds, Reefers, Tankers, Rental Assets, Heavy Equipment
