

POWERQFLEET®

Powerfleet Unity

Every asset, vehicle, and person all in a unified platform with Powerfleet Unity

We know you have varying needs for managing your business.

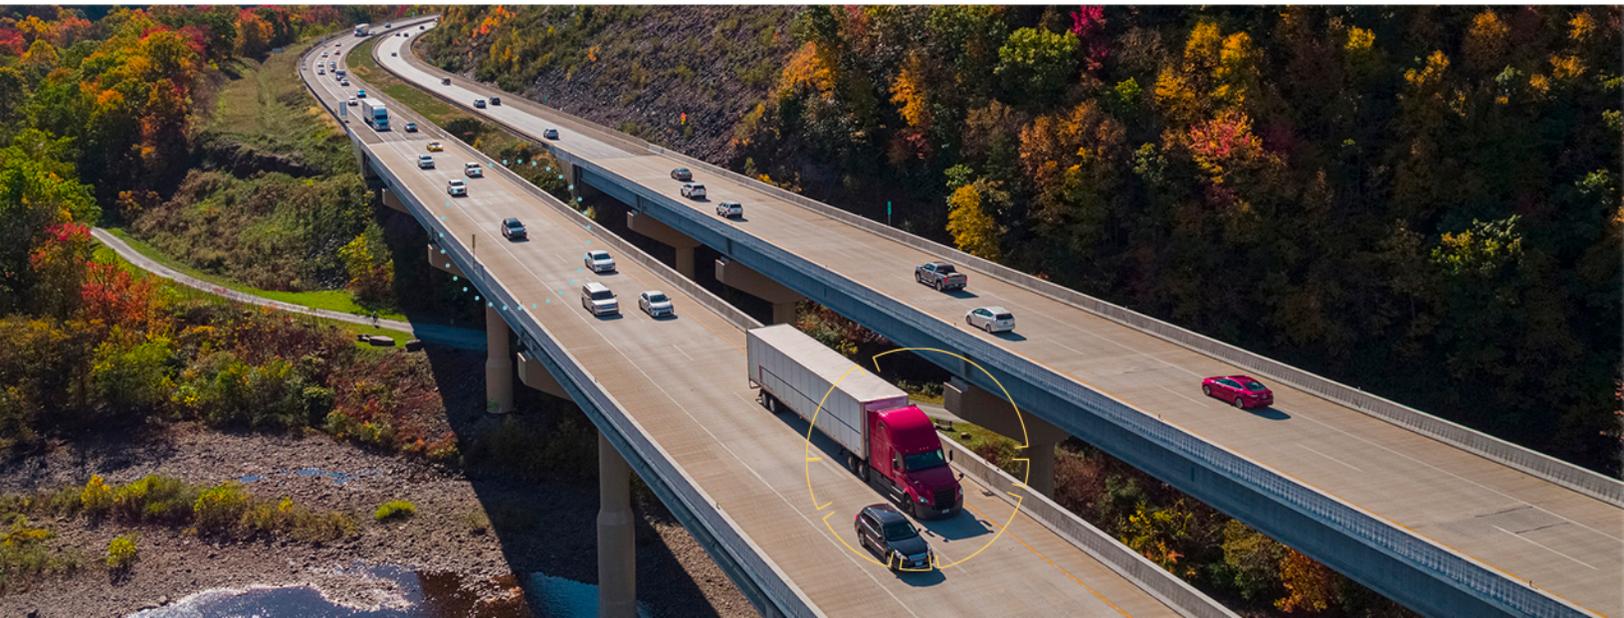

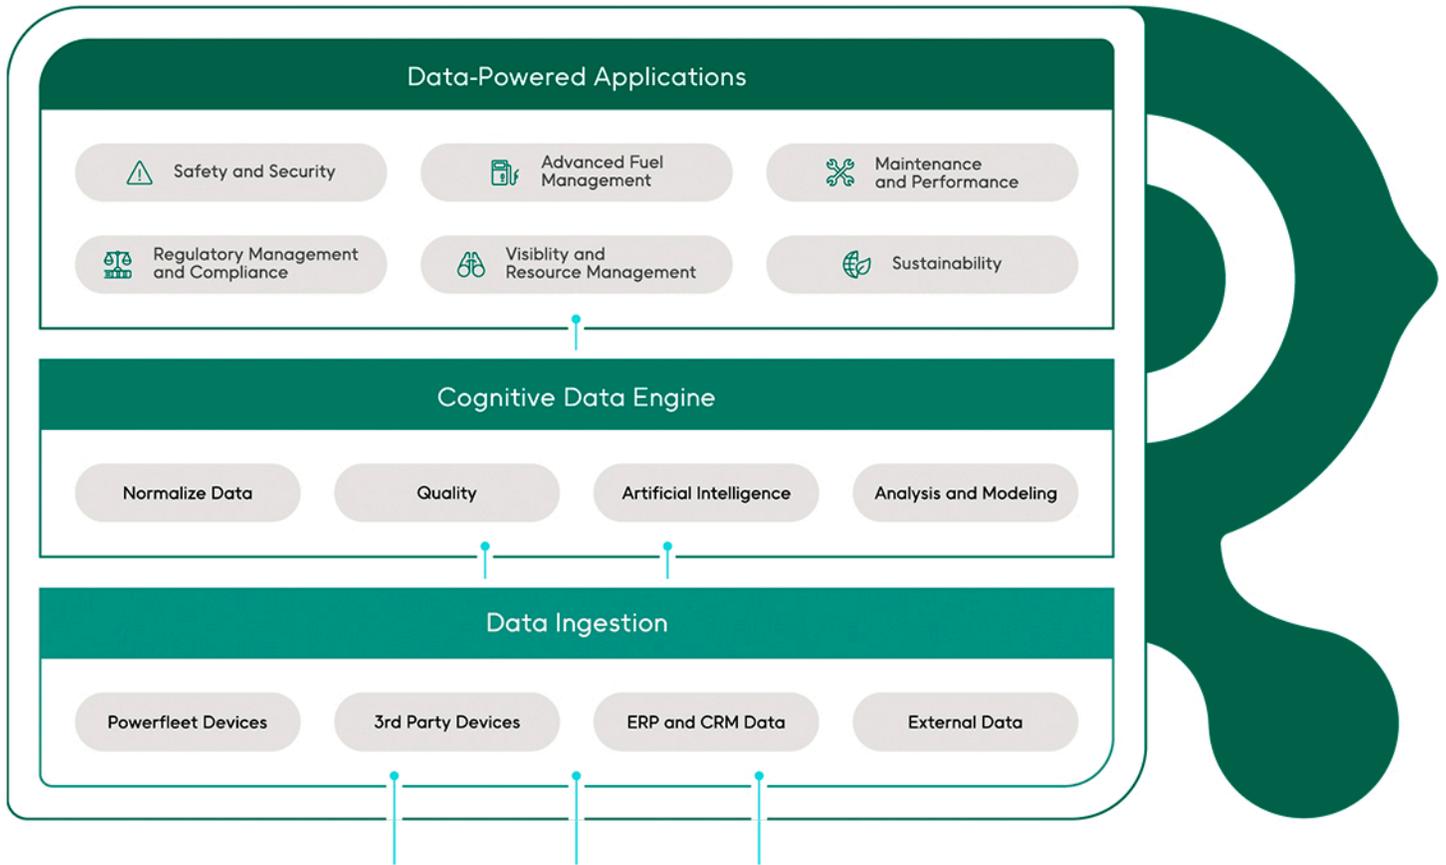

Each organization we help may have different vehicles, assets, drivers, and goods they are responsible for managing. This can range from light passenger vehicles to tractors and could include delivery trucks, trailers, and chassis. As you continue to grow and evolve, so do your needs for managing these high value assets and people. This has left many businesses forced to use multiple tools and institute manual processes to manage their fleets, leading to a lack of visibility, poor productivity, increased risks and liability, operational inefficiencies, and immense costs.

Powerfleet Unity is an innovative software platform capable of ingesting, processing, and enriching data from Powerfleet devices and sensors, third-party devices and sensors, vehicle and infrastructure OEMs, and integration data sources, resulting in meaningful data insights to improve business operations and advance digital transformation initiatives.

Solution at a Glance

Powerfleet Unity, our fleet intelligence platform, unites people, assets, and IoT device data together to transform the way you do business. Powerfleet Unity's Cognitive Data Engine applies Artificial Intelligence (AI) and Machine Learning (ML) to power traditional operational benefits as well as new data-powered applications to solve our customer's most intractable challenges.

POWERFLEET UNITY

Key Features

Safety and Security

Use livestream data to enhance driver coaching and performance to reduce accidents on the road. In addition, use third-party data to help identify danger spots for your drivers and proactively work around them to further reduce risk.

Advanced Fuel Management

Proactively manage fuel costs, avoid fuel theft, coach drivers based on driving behaviors, and achieve sustainability goals.

Maintenance and Performance

Reduce downtime, breakdowns, and manage your maintenance operations based on real-world usage and history to ensure you don't over or under service assets to avoid unnecessary costs.

Regulatory Management and Compliance

Automate compliance workflows, record keeping, and enable your drivers to focus on getting to their destinations safely and on time.

Visibility and Resource Management

Analyze asset, vehicle, and people utilization to avoid costly rentals, reduce theft, and under-used resources to increase efficiency and ensure your team is where they are needed.

Sustainability

Advance your green agenda. Unity is ready to support your organization's transition to electric vehicles (EV) with hundreds of EV data elements to optimize fleet planning, battery range, EV safety, and maintenance.

Single Pane of Glass

Powerfleet Unity provides one entry point to manage many different connected assets, regardless of asset or device type, and without sacrificing device functionality. These include driver and road-facing cameras, ELDs, cold chain sensors, vehicle and asset tracking, cargo monitoring, and access to third-party device data. Experience seamless navigation within the application and a single pane of glass for viewing and searching for any resources, landmarks, or points of interest.

Unity's extensive integration library of data sensory device types coupled with our modular, business performance improvement solutions allow customers to receive rapid speed to value and deliver dramatic positive change to their business. Powerfleet's Unity platform, advanced modular solutions, and data science will continue to help Powerfleet customers save lives, time, and money.

Powerfleet (NASDAQ: PWFL; TASE: PWFL) is a global leader of internet of things (IoT) software-as-a-service (SaaS) solutions that optimize the performance of mobile assets and resources to unify business operations. Our data science insights and advanced modular software solutions help drive digital transformation through our customers' and partners' ecosystems to help save lives, time, and money. We help connect companies, enabling customers and their customers to realize more effective strategies and results. Powerfleet's tenured and talented team is at the heart of our approach to partnership and tangible success. The company is headquartered in Woodcliff Lake, New Jersey, with our Pointer Innovation Center (PIC) in Israel and field offices around the globe.
