

Transform Your Warehouse Operations with Powerfleet's In-Warehouse Solutions

In dynamic environments like warehouses, distribution centres, and manufacturing facilities, managing a diverse fleet of vehicles and ensuring safety, compliance, and productivity can be challenging. Powerfleet understands the everyday obstacles you face—labour shortages, stringent safety regulations, and unexpected equipment downtime—leading to inefficiencies and increased risks. We offer the right technology to help you gain control and visibility over your operations.

- Access Control
- Electronic Safety Checklist
- Impact Management
- Fleet Utilisation
- Preventative Maintenance
- Text Messaging
- Battery Monitoring
- Automated Notifications
- On Demand & Scheduled Reporting
- Pedestrian Proximity Detection
- Speed Management
- Incident Reconstruction
- Location Assessment
- APIs

Our Purpose-Built Solutions

- **Unity Platform:** Integrates seamlessly with IoT devices and third-party systems, providing data-driven insights for smarter decision-making.
- **Forklift Gateway:** Enhances safety and efficiency by managing access, enforcing safety protocols, and monitoring equipment performance.
- **Pedestrian Proximity Detection:** Detects hazards with AI technology, alerting operators and capturing critical event data.
- **Digital Video Recorder (DVR):** Provides continuous monitoring and recording to enhance safety and accountability.
- **Speed Manager:** Automatically adjusts forklift speeds to prevent accidents and ensure safety compliance.

Drive Operational Excellence with Powerfleet

Powerfleet's innovative solutions help you overcome everyday challenges, streamline operations, and achieve greater safety and efficiency. **Let us help you transform your warehouse for success.**
