

People Powered IoT

With over 8,000 customers worldwide, we know a thing or two about delivering value to leading enterprise companies. And it's all about powering the unification of your business operations to help you **save lives, time, and money.**

Our fleet intelligence platform, Unity, takes on the heavy lifting by ingesting data from all of your disconnected data sources, transforming that data into real-world, decision-grade insights, enabling your operating systems to be more effective, and empowering you to make more informed decisions at the speed of business.

Enabled by our data science, in-house designed hardware, and enterprise SaaS applications, including Safety and Security, Advanced Fuel Management, Maintenance and Performance, Regulatory Management and Compliance, Visibility and Resource Management, and Sustainability, companies can solve their greatest business challenges with Powerfleet.

Our tenured and talented team is at the heart of our approach to partnership and tangible success.

Revolutionizing Industries and Reshaping the Future of IoT

Industrial

High speed and complex facilities within the automotive, distribution, manufacturing and distribution verticals drive the need for innovative workplace safety, collision avoidance, and compliance solutions.

Purpose-built platform for:

- Decreased safety incidents involving inventory, equipment, racking, and most importantly pedestrians with our advanced AI-driven pedestrian proximity detection system
- Improved compliance, maintenance, and utilization reporting
- Minimized down time for your material handling equipment
- Holistic visibility into all of your material handling equipment with our OEM agnostic platform

Transportation and Logistics

Soaring demand for resilient supply chains drive the need for real-time visibility and data unification across all IoT and OEM device types. Well-equipped to solve challenges related to In-Cab, Dry Van Trailers, Reefers, Chassis, Containers, and Cargo.

Purpose-built platform for:

- Improved visibility with real-time, real-world insights via GPS tracking
- Holistic visibility into all of your assets with a vendor agnostic platform
- Improved safety via dash cameras and driver behavior scoring
- Increased compliance with electronic logging device (ELD)
- Asset tracking and utilization
- Successful cargo journey – within temperature range, on time, and in full
- Achieving ESG goals with advanced fuel management and fleet electrification

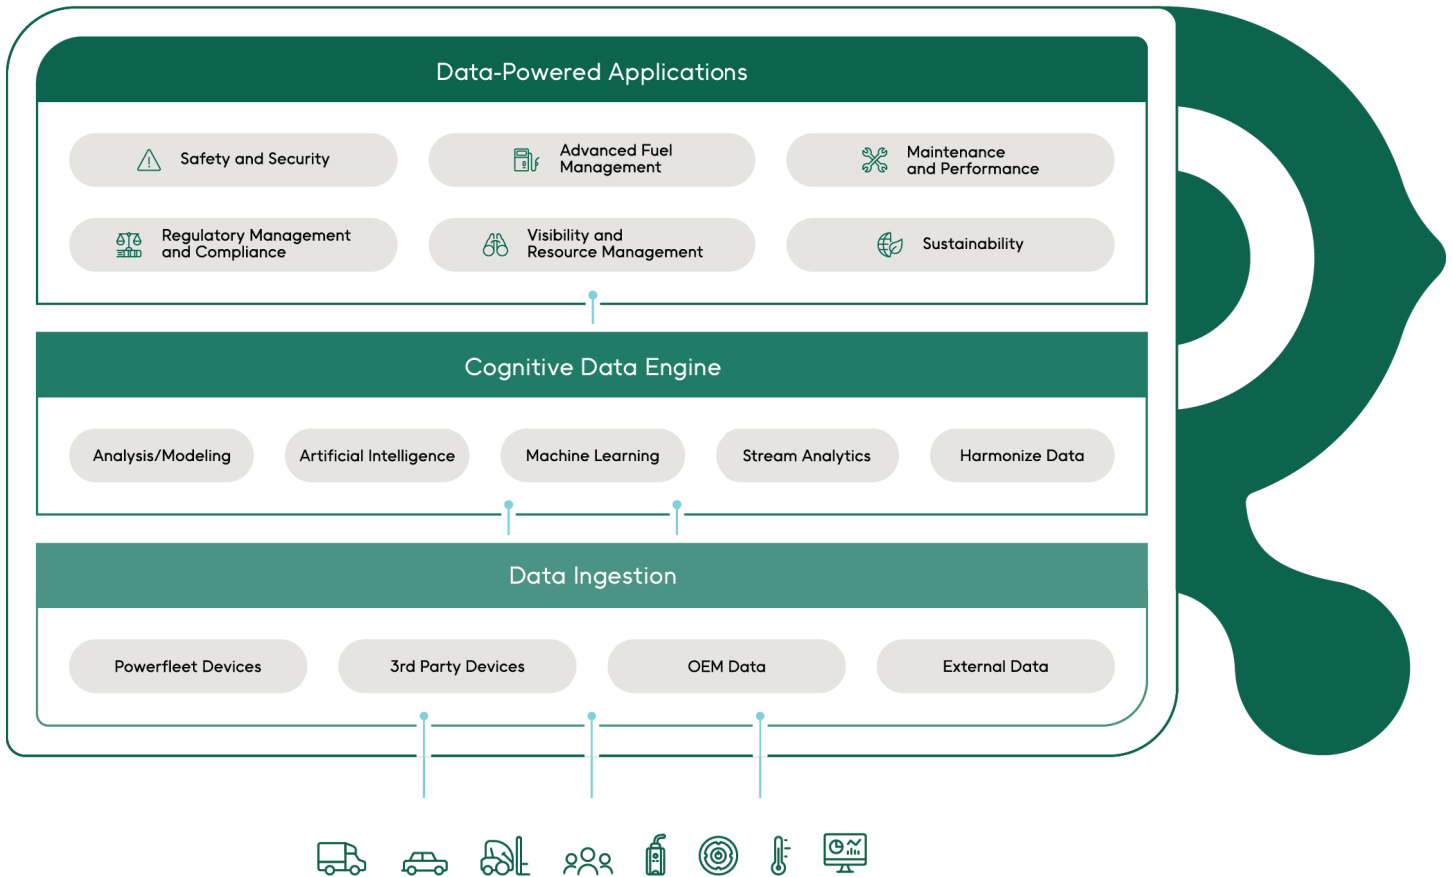

Connected Vehicle

Suitable for mid to large commercial fleets seeking decision-grade insights into asset, person, and vehicle performance.

Purpose-built platform for:

- Increased visibility and resource management via GPS tracking
- Improved safety via dash cameras and driver behavior scoring
- Theft prevention and stolen vehicle recovery
- Compliance with local and global regulations
- Achieving ESG goals with advanced fuel management and fleet electrification

POWERFLEET UNITY

Powerfleet Unity unites your mobile assets, your drivers, and your business system data together, in a single pane of glass, to transform the way you do business.

Powerfleet (NASDAQ: PWFL; TASE: PWFL) is a global leader of internet of things (IoT) software-as-a-service (SaaS) solutions that optimize the performance of mobile assets and resources to unify business operations. Our data science insights and advanced modular software solutions help drive digital transformation through our customers' and partners' ecosystems to help save lives, time, and money. We help connect companies, enabling customers and their customers to realize more effective strategies and results. Powerfleet's tenured and talented team is at the heart of our approach to partnership and tangible success. The company is headquartered in Woodcliff Lake, New Jersey, with our Pointer Innovation Center (PIC) in Israel and field offices around the globe.
